DELIVERY YOU CAN RELY ON.

KFI CARGO CONTROL is one of the leading manufacturers on the European market. Leading companies all over Europe (from industry, logistics, retail, skilled trades) rely on us and our products to secure their valuable cargo.

Thanks to our in-house production at the Dillingen / Saar site, we can ensure that individual and short-notice customer requests are realised optimally and promptly.

No matter what hook, belt, colour, length or ratchet – you configure the product – we implement it perfectly.

Quality – with safety:

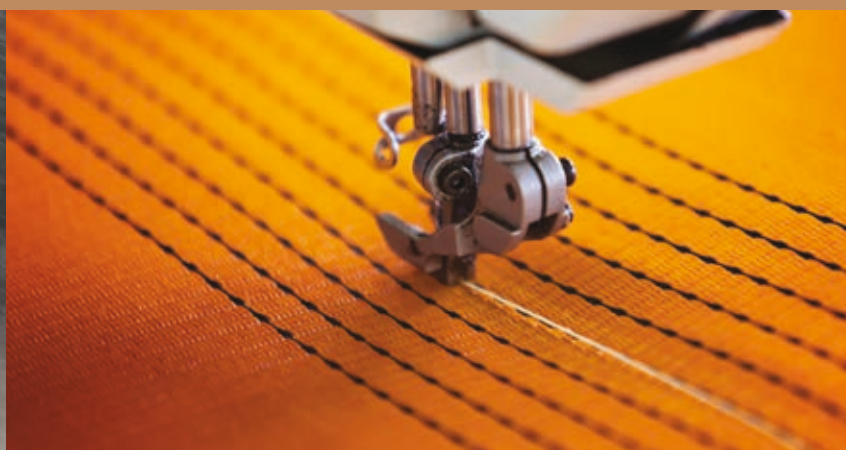

- Crafted with high-quality materials
- Comprehensive checks to ensure quality
- Our straps are TÜV- and DEKRA-certified (*)

Needless to say, we have a large selection of standard versions permanently available in stock, in different lengths with various hooks and ratchets.

These products are available in our online shop at: www.kfi-shop.de, or get in touch with our customer advisor to discuss your wishes.

We have very discerning customers. And securing cargo presents touch challenges that need to be dealt with at a rapid pace. The solution is a custom design.

We are always happy to tackle these challenges, as we are able to respond directly and with a solution-oriented approach.

When time is of the essence, we can produce and dispatch on the same workday.

Our highly qualified team of experienced employees and cutting-edge machinery are the key to a fast and efficient solution. No matter what challenges we face.

For you, this means maximum flexibility, combined with transparent costs.

>>>

The key to a fast and efficient solution.

The advantages of our lashing straps:

- Special yarn for maximum load capacity, extremely UV- and weather-resistant
- Quality belts made in Europe with in-house production
- On request: chromium trioxide-free fittings

DURABLE SAFETY. UNIQUE AND TESTED.

Label on the inside:

we attach the label on the inside of the strap. This means that the label will stay on for longer, and will be protected from ripping or weather damage. The advantage for you is that the lashing strap lasts longer, saving you good money. After all, the law dictates that straps need to be replaced when a component on the label is no longer legible or if the label is missing.

TÜV-approved*:

Although a TÜV inspection is not required by law for lashing straps, we like to play it safe. Our satisfied and loyal customers are testimony to this high level of quality.

No matter what challenges we face.

- Environmentally friendly production with high quality standards
- On request: INNO-LASH belt, extremely robust for long service life
- You are free to choose you own combination of hooks, belts and ratchets
- For larger batches, you can choose the strap colour

A STRAP WITH YOUR LOGO.

LASHING STRAPS: AS INDIVIDUAL AS YOUR COMPANY

Logo print and lettering on the strap:

Your personal print makes the lashing strap unique and also serves as advertising for your company. Because this strap shows that you take safety very seriously.

The facts:

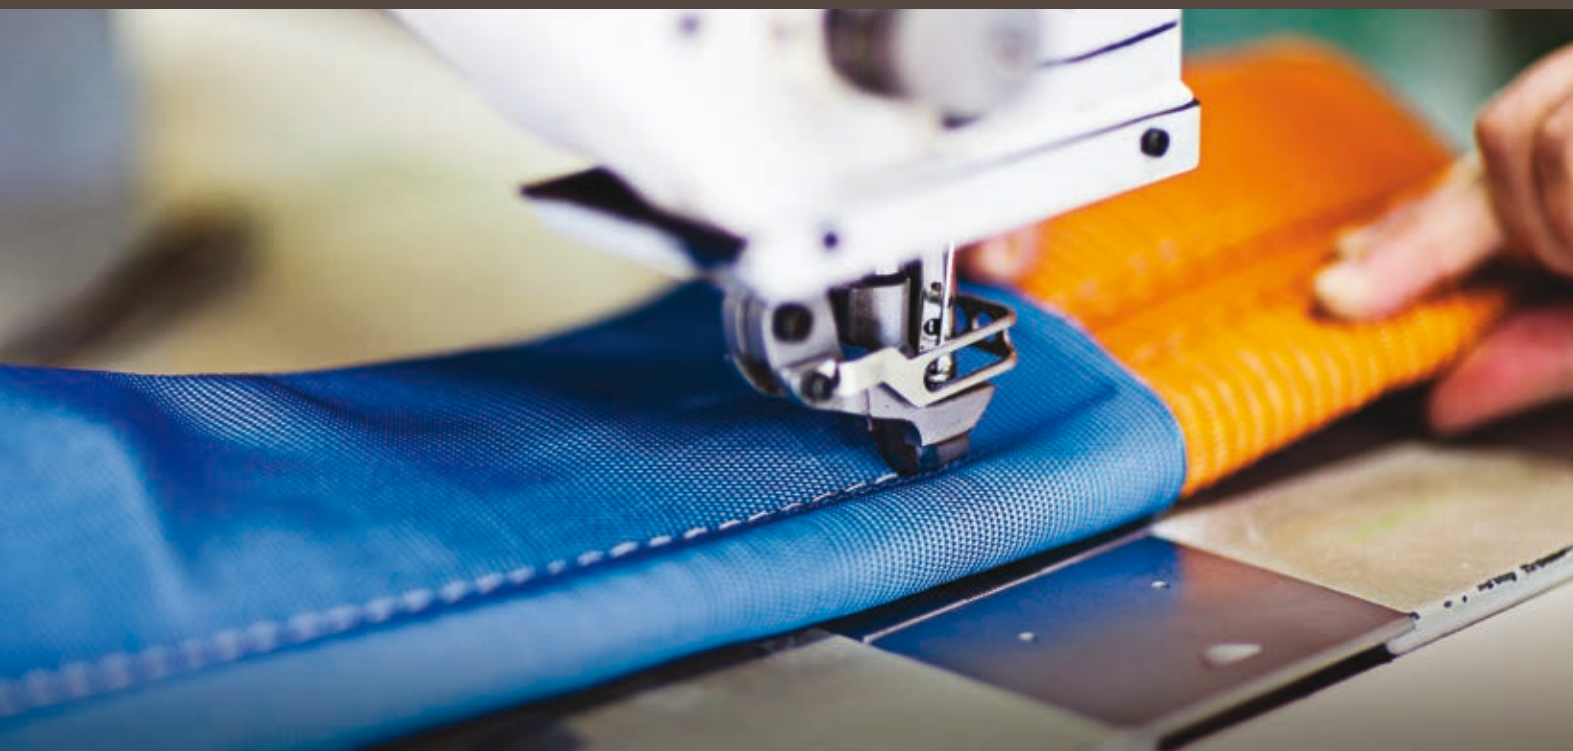

- Logo print and lettering in 12 colours
- Many different strap colours to choose from (blue, red, yellow, green, etc.)
- Crafted with high-quality materials
- Custom branding in batches as small as 50 pieces

Custom designs:

With an in-house sewing workshop, we are able to realise special customer requests and custom solutions promptly. In addition to the quality claim 'Made in Germany', your company name can be added to the label.

Express service:

If the components you have ordered are in stock, they can be sent on the same day.
